

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has improved our time at home 100%. We Use to get call as late as 10:00Pm through the week and as Early as 8:00am on Saturday & Sunday Mornings. We still get nuisance calls from political & Charitable orginazation which are not needed. If any thing strenghten the law and stop all these not needed calls. We use to get 12 to 25 call a week by salesmen and computer generated calls. our answering machine would have several all the time. since the indiana law 90% of these unwanted calls have stopped and its time now that the Fcc stop the rest of them.

Thank You

Dennis & Kathy Young
